

# EQAS Immunoassay (Monthly) Program

**External Quality Assessment Suited for Your Laboratory**

- Select from 35 of the most commonly tested immunoassay analytes including endocrinology, thyroid function, oncology and therapeutic drugs
- 12 human serum based samples are provided in each twelve-month cycle
- Samples are tested and results submitted once per month
- Electronic data submission option using eForms software
- Laboratory specific reports in an easy-to-read format with online viewing

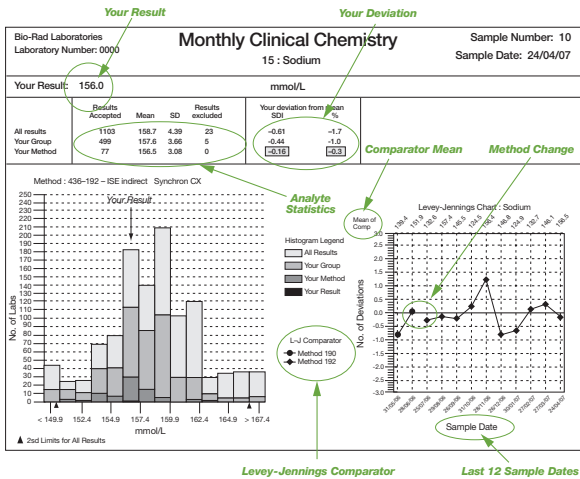

**BIO-RAD**

# EQAS Reports

Participants receive 12 monthly reports and one end-of-cycle report over each program cycle. All reports are available within three days of the statistical analysis.

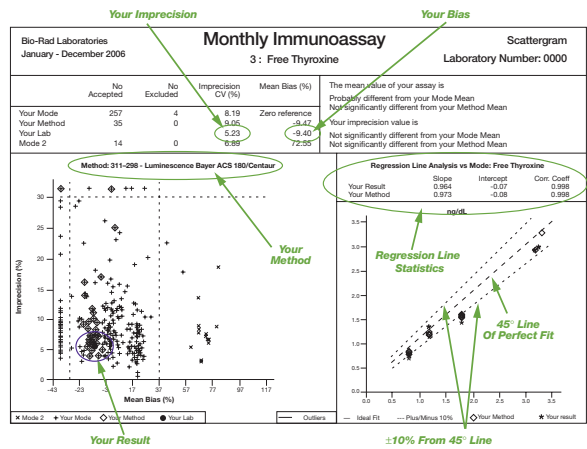

## Monthly Report (Example)

Detailed individual statistical analyses and peer group comparisons are provided.

## End-of-Cycle Report (Example)

An overall assessment of laboratory performance over the entire cycle in terms of bias and imprecision among participating laboratories is presented.

**Additional Reports (available on request):** Sub-Group Reports, Instrument/Method Summary Report

### Analytes for EQAS Immunoassay (Monthly) Program

- |                                |                                          |                                        |                                           |
|--------------------------------|------------------------------------------|----------------------------------------|-------------------------------------------|
| 17- $\alpha$ -OH-Progesterone  | DHEA-Sulfate                             | Luteinizing Hormone (LH)               | Testosterone                              |
| $\beta$ -2 Microglobulin       | Digoxin                                  | Parathyroid Hormone (PTH), Intact      | Theophylline                              |
| Alphafetoprotein (AFP)         | Estradiol                                | Phenobarbital                          | Thyroid Stimulating Hormone (TSH)         |
| CA 15-3                        | Ferritin                                 | Phenytoin                              | Thyroxine (T <sub>4</sub> ), Total        |
| CA 19-9                        | Folate                                   | Progesterone                           | Triiodothyronine (T <sub>3</sub> ), Total |
| CA 125                         | Follicle Stimulating Hormone (FSH)       | Prolactin                              | Valproic Acid                             |
| Carbamazepine                  | Free Thyroxine (FT <sub>4</sub> )        | Prostate Specific Antigen (PSA), Free  | Vitamin B <sub>12</sub>                   |
| Carcinoembryonic Antigen (CEA) | Free Triiodothyronine (FT <sub>3</sub> ) | Prostate Specific Antigen (PSA), Total |                                           |
| Chorionic Gonadotropin (hCG)   | Growth Hormone (hGH)                     |                                        |                                           |
| Cortisol                       | Immunoglobulin E (IgE)                   |                                        |                                           |

Refer to the package insert of currently available lots for specific analyte and stability claims

### Ordering Information (Additional Programs Available)

Cat #	EQAS Programs	Quantity
BC7L	Immunoassay (Monthly) Program (8 analytes)	12 x 5 mL
BC70	Immunoassay (Monthly) Program (17 analytes)	12 x 5 mL
BC75	Immunoassay (Monthly) Program (35 analytes)	12 x 5 mL
CS7L	Immunoassay (Monthly) Program (8 analytes)	Report Only
CS70	Immunoassay (Monthly) Program (17 analytes)	Report Only
CS75	Immunoassay (Monthly) Program (35 analytes)	Report Only
QC75	Immunoassay (Monthly) Program (specimen pack only)	12 x 5 mL
